1998/1999 FINAL STANDARDIZED PROGRAM INFORMATION REPORT INSTRUCTIONS

CLARIFICATIONS AND REVISIONS

The Standardized Program Information Report (SPIR) clarifications and revisions listed below were initiated in order to renew the reporting format through the Office of Management and Budget. OMB's approval has been received and is effective through June 30, 2000. The SPIR renewal process included convening a Technical Workgroup that discussed many of these changes and also publication of proposed revisions in the Federal Register. This final, approved SPIR reflects the work of the SPIR Technical Workgroup and the comments received from the Federal Register and also includes changes made to partner more closely with other workforce programs such as Welfare to Work, and to transition to future reporting needs under new workforce legislation.

It is acknowledged that the lateness of this approval coupled with the uncertainly about data collection and reporting in the future makes implementation of these changes more difficult. As a result the Department is allowing these changes to be optional. States have the option of reporting according to these revised instructions for both Program Year 1998 and Program Year 1999; States may also choose to continue reporting fully or partially by the previous instructions. The Department and its statistical support/database management entities will continue to accept reports by either version so long as the State identifies in its reporting submission which version of SPIR is being followed, where appropriate.

PROGRAM YEAR 1998/1999 SPIR REVISIONS
